Dear Valued Customer,

South Florida's warm and humid climate provides a perfect environment in your attic for large outdoor roaches and carpenter ants to breed.

Carpenter ant infestation can start in your attic and spread down into the walls of your home. Populations find their way into your attic or crawl space, which is a place in the house not often thought of to treat. Repair and elimination of the carpenter ant infestation in your home can be a costly situation for a homeowner. This situation can be prevented by having an **annual attic treatment** done by Core Pest Control.

This treatment consists of placing bait throughout the attic that the insects feed on and die. Ant bait was developed to exploit the foraging and nest mate feeding behaviors of ants. Baits are the most effective way to get toxicant into the nest. Bait treatments are effective for control of many ant species. This treatment is also very effective in reducing silverfish and spiders in your attic or crawl space areas.

This treatment is highly recommended for the protection of your home and any articles you may store in your attic or crawl space.

The price for your home will be \$180.00

Please fill out and return this form by mail or email to [Core20023@gmail.com](mailto:Core20023@gmail.com).  
We will contact you in the near future to set up a date and time to provide this service. Thanks.

-----  
Yes, I would like an annual attic treatment performed.

Price : \$180.00
